

## Coasts, Marine Structures and Breakwaters 2009 Adapting to Change

16 – 18 September 2009  
Edinburgh International Conference Centre, Scotland, UK

**IEI Members**  
are entitled to a  
**£100 discount off**  
standard fee

The **Institution of Civil Engineers** is delighted to announce that registration for the **Coasts, Marine Structures and Breakwaters 2009 Conference** is now open.

The conference will address the design, performance, installation and maintenance of breakwaters, seawalls, jetties, piers and beach control structures. The latest material on the design and installation of the structures necessary to extract marine and wind energy around nearshore seas and coasts will also be covered.

With support from over **30 international organisations** this will be the ninth conference in the successful Breakwaters series. The conference is an internationally recognised forum for forthright discussion with a strong emphasis on practical application and where advances, as well as areas of debate, are duly highlighted.

Over **130 high-profile practitioners and academics** have, subject to a rigorous process of peer review, been invited to present the most up-to-date case studies and research in the coastal engineering arena. All papers will be made available electronically to delegates in advance to facilitate and encourage informed discussion during the conference.

The conference will be held at the **Edinburgh International Conference Centre**, a state-of-the-art venue in the heart of one of the world's most historic and enchanting cities. Integral to the event will be a **technical exhibition** that will provide a range of companies and organisations with the ideal environment to showcase their skills and products to a high-profile international audience.

### Pre-Conference Short Course

On **Tuesday 15 September** the University of Edinburgh will host a one-day short course on the **Design of Coastal Structures** presenting a focussed summary of key recent developments in this field.

### Conference Fringe

In addition to the 130+ authors already invited to submit formal papers, the conference will also accept a number of short technical notes, announcements and position papers for less formal presentation.

### Registration Open

**A10% discount on the registration fee** is available for bookings before 30 April 2009.

To register and for more information please visit [www.ice-breakwaters.com](http://www.ice-breakwaters.com).
